

IFESINACHI EKE

Frontend & Full-Stack Developer

Ekesamrose@gmail.com | 08076260047 | Remote/Hybrid | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Full-stack developer with a frontend specialism, currently building Ticker — a live, production event-ticketing platform covering authentication, payments, and PDF generation. Background in three frontend internships delivering responsive, accessible interfaces under deadline; now expanding across PHP/MySQL backend work, deployment, and infrastructure.

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Sass/SCSS, Tailwind CSS, REST APIs, Axios, Fetch, Zustand

Backend & Database: PHP, JWT Authentication, Apache, MySQL

Tools & DevOps: Git, GitHub, Docker, Postman, Vite, Vercel, Railway, Figma, VS Code

EXPERIENCE

Frontend Developer Intern — FlexiSaf Edusoft Limited (Remote)

Aug 2025 – Nov 2025

- Completed an intensive web development internship, finishing mentor-assigned tasks and milestone projects ahead of schedule.
- Built responsive, accessible web interfaces using HTML5, CSS3, and JavaScript (ES6+), with disciplined Git/GitHub workflows.
- Engineered a capstone mini-project applying end-to-end frontend architecture and clean-code standards.

Frontend Developer Intern — Genesys Tech Hub (Remote)

Sep 2025 – Dec 2025

- Shipped production-ready frontend projects weekly — interactive dashboards, application forms, a to-do tool, and a portfolio site — under strict deadlines.
- Authored modular, maintainable HTML5/CSS3/JavaScript with a mobile-first responsive approach.
- Managed version control workflows via Git & GitHub, including branching strategy and repository upkeep.

Frontend Developer Intern — Code and Create BootCamp (Remote)

Jun 2025 – Sep 2025

- Collaborated cross-functionally with a Project Manager, Product Designer, and Data Analyst to build the official bootcamp website.
- Translated Figma mockups and brand requirements into a fully responsive, pixel-perfect site with HTML5, CSS3, and JavaScript.
- Took part in team code reviews and sprint cycles to keep delivery aligned across disciplines.

PROJECTS

Ticker — Full-Stack Event Ticketing Platform | [Live Site](#) [Backend Repo](#) [Frontend Repo](#)

Tech: PHP, MySQL, React, Tailwind CSS, JWT, Paystack API, Docker, Railway, Cloudflare Tunnels, Cloudinary, Browsershot

- Built a production event ticketing platform with JWT authentication, automated Paystack payment splits, and a stateless API backend.
- Implemented server-side ticket/PDF generation and cloud asset management, serving live traffic over a custom domain with SSL/TLS.
- Optimized SEO and Open Graph metadata for individual event pages (title, description, banner).

Bag Bank — Full-Stack Fintech Mobile Banking App | [GitHub Repo](#)

Tech: PHP, MySQL, JavaScript, HTML5, CSS3, REST APIs, Apache

- Built a responsive digital banking interface with automated account number generation, simulated ATM card applications, deposits, and peer-to-peer transfers.
- Architected fully functional REST endpoints with real-time UI feedback during financial transactions; deployed and live for one month.

Women Techmakers Book Launch — Event Portal | [Live Site](#) [GitHub Repo](#)

Tech: React, CSS3, JavaScript, Responsive Web Design

- Designed and deployed the official event portal for Women Techmakers (Nsukka & Enugu), optimizing performance and conversion for a regional tech community.

Code & Create Bootcamp Website | [Live Site](#) [GitHub Repo](#)

Tech: HTML5, CSS3, JavaScript, Figma, Vercel

- Co-developed the bootcamp's public site, translating Figma mockups into responsive components; deployed via continuous Vercel hosting.

Nexus Capstone Project — Festival Event App | [Live Site](#) [GitHub Repo](#)

Tech: HTML5, CSS3, JavaScript, UI/UX Design

- Built an interactive festival event app aimed at maximizing ticket conversion and clarifying schedules to cut support inquiries.

Blog Web Application — RESTful CRUD App

Tech: JavaScript (ES6+), HTML5, CSS3, Node.js, REST APIs, JSON

- Built a dynamic blog with full CRUD via standard HTTP verbs (GET, POST, PUT, PATCH, DELETE) and asynchronous, real-time UI updates.

EDUCATION & CERTIFICATIONS

B.Sc. Plant Science and Biotechnology — University of Nigeria, Nsukka

2020 – Dec 2024

Leadership & Service: Served as Faculty President and Class Representative, coordinating student activities and departmental initiatives.

Diploma in Full-Stack Web Development — Digital Dreams ICT Academy

May 2025 – Feb 2026

Certifications: Frontend Web Development — Code & Create Bootcamp; Web Development Programme — FlexiSaf Edusoft
